

Project 02 – Estimation of Person Hours

Using previous Estimation and Actual Recorded Time Spent as basis for this analysis!

(15 PH Coding / 4 Meetings + GTA Meeting = 12 PH / 2 PH on Documentation

1. 5 Person Hours on General Code Design

13 Person Hours – Code Implementation

Double checking work already done on program / code restructuring – 3 Hours

Adding in two new Features, 5 hours estimated on each

6 Person Hours – Building Assets

(Set aside for scenario where animation / sound design is part of added features)

5 Person Hours – Testing and Debugging

3 Hours are expected to be spent on debugging and stress testing added features

An extra 2 PH are set aside to be spent on debugging project before new features are implemented.

6 Person Hours on Documentation

2 PH on PH Estimation and Reporting

2 PH on Code Documentation

2 PH on UML Diagrams for Added Features

1 GTA meeting before project 2 due! - 2 Person Hours

4 general Team meetings - 10 Person hours

TOTAL ESTIMATED PERSON HOURS – 43.5 Person Hours are expected to be spent on Project 2
